PROFESSIONAL SUMMARY

Final-year Computer Engineering student (B.Tech, 2027) with hands-on experience in software testing, quality assurance, and defect analysis gained through applied security testing projects. Skilled in functional, regression, and end-to-end testing methodologies, test case design, and defect documentation, developed through rigorous vulnerability assessment and Capture-The-Flag (CTF) competition work. Experienced in API testing, web application testing, and building measurable quality benchmarks (attack detection rates, false-positive thresholds, latency reduction). Strong analytical, communication, and technical documentation skills. Seeking a Software Testing Engineer role to apply a detail-oriented, process-driven testing mindset.

CORE COMPETENCIES

- Manual & Functional Testing
- Test Case Design & Test Scenario Planning
- Regression & End-to-End Testing
- Defect Identification, Documentation & Tracking
- API Testing & Web Application Testing
- Vulnerability & Risk Assessment
- Analytical & Problem-Solving Skills
- Technical Documentation & Reporting

EDUCATION

Bachelor of Technology, Computer Engineering — 08/2023 – 08/2027

Sanjivani College of Engineering, Kopergaon, Maharashtra — CGPA: 7.5

Higher Secondary Certificate (HSC) — 07/2021 – 03/2023

K J Somaiya College, Kopergaon, Maharashtra — Percentage: 74.5%

Secondary School Certificate (CBSE) — 07/2011 – 03/2021

Montfort School, Shirdi, Maharashtra — Percentage: 81.0%

TECHNICAL PROJECTS

Web Application Firewall with Real-Time Threat Intelligence

- Designed and executed a structured test plan to validate a self-hosted Web Application Firewall against simulated attack scenarios, identifying and documenting defects across detection logic.
- Achieved a verified detection benchmark of 196+ simulated attacks neutralized while maintaining a false-positive rate below 4.94%, demonstrating rigorous test case coverage and quality validation.

OSINT Aggregation Platform

- Built and functionally tested a React/TypeScript platform integrating 6 reconnaissance modules, running end-to-end and regression tests across each integration point.
- Reduced search latency by 38.7% through iterative performance testing and validation cycles.

Quantum Messaging System

- Developed and stress-tested a Python-based messaging framework, validating stability across 48 simultaneous encrypted sessions with zero plaintext data storage.
- Performed security and functional testing across 12 identified attack vectors to confirm mitigation coverage.

TECHNICAL SKILLS

Programming Languages: Python, Bash, C++, C, JavaScript, HTML, CSS

Testing & Security Tools: Burp Suite, Nmap, Wireshark, Metasploit, Postman-style API testing, Git/GitHub

Concepts: Functional Testing, Regression Testing, API Testing, Vulnerability Assessment, Defect Tracking

CERTIFICATIONS

- Cyber Security Essentials — Coursera
- NPTEL, IIT Kharagpur: Employment Communication — 86% (Elite)
- NPTEL, IIT Kharagpur: English for Thesis Writing — 78%

ACHIEVEMENTS

- National Finalist — Top 60 nationally in Cryptnite, a national CTF hosted by Manipal Institute of Technology (MIT), Bengaluru.
- Rank 46 — VishwaCTF 2026.
- Rank 77 — BoroCTF 2026 (CyberAcad.org)
- Participated in an Open Source Hackathon hosted by IIT Bombay and Enginow.
