PROFESSIONAL SUMMARY

Final-year Computer Engineering student (B.Tech, 2027) with hands-on experience in offensive security, Capture The Flag (CTF) competitions, and applied security research. Comfortable across web security, network security, cryptography, and OSINT, with growing exposure to reverse engineering and binary exploitation. Built three independent security projects covering post-quantum messaging, OSINT aggregation, and web application firewalls. National CTF finalist with consistent placements across national and international competitions. Strong technical writing and documentation habits from tracking exploits, defenses, and CTF solutions. Seeking a Cybersecurity Intern role to contribute to CTF challenge design, security research, and technical content creation.

CORE COMPETENCIES

- Web Security & API Security Testing
- Network Security & Analysis
- Cryptography
- OSINT (Open-Source Intelligence)
- CTF Challenge Solving & Design
- Vulnerability Assessment
- Technical Writing & Documentation
- Reverse Engineering & Binary Exploitation (foundational)

EDUCATION

Bachelor of Technology, Computer Engineering — 08/2023 – 08/2027

Sanjivani College of Engineering, Kopergaon, Maharashtra — CGPA: 7.5

Higher Secondary Certificate (HSC) — 07/2021 – 03/2023

K J Somaiya College, Kopergaon, Maharashtra — Percentage: 74.5%

Secondary School Certificate (CBSE) — 07/2011 – 03/2021

Montfort School, Shirdi, Maharashtra — Percentage: 81.0%

TECHNICAL PROJECTS

Web Application Firewall with Real-Time Threat Intelligence

- Designed and built a self-hosted, open-source Web Application Firewall as a cost-efficient alternative to premium mitigation services for small enterprises.
- Tested against 196+ simulated attack scenarios, neutralizing them while holding the false-positive rate below 4.94% through iterative rule tuning.

OSINT Aggregation Platform

- Engineered a centralized OSINT hub (React, TypeScript) integrating 6 reconnaissance modules for domain and geolocation lookups, removing tool-switching friction for investigators.
- Reduced search latency by 38.7% through workflow and query optimization.

Quantum Messaging System

- Built a Python-based messaging framework applying post-quantum cryptography to defend against quantum-level threats and strengthen metadata privacy.
- Mitigated exposure across 12 attack vectors while sustaining 48+ simultaneous encrypted sessions with zero plaintext data storage.

TECHNICAL SKILLS

Programming & Scripting: Python, Bash, C++, C, JavaScript, HTML, CSS

Security Tools: Burp Suite, Nmap, Wireshark, Metasploit, Hydra, John the Ripper, Git/GitHub

Topic Areas: Web Security, Network Security, Cryptography, OSINT, Vulnerability Assessment; foundational Reverse Engineering & Binary Exploitation

CERTIFICATIONS

- HackerRank: SQL — 5-Star Certified
- Cyber Security Essentials — Coursera; Python & C Programming
- Cisco Networking Academy — Cyber Threat Management; WSCube Tech — Complete Linux Mastery
- Honeywell Future Skills Edge Program — Cybersecurity (BharatCares); Google Cloud Study Jam 2023 (GDSC)

- NPTEL, IIT Kharagpur: Employment Communication — 86% (Elite); English for Thesis Writing — 78%
- TryHackMe: Cyber Security 101 ,Pre Security , Web Fundamentals - Legacy

ACHIEVEMENTS — CTF & CYBERSECURITY COMPETITIONS

- National Finalist — Top 60 nationally in Cryptnite, national CTF hosted by Manipal Institute of Technology (MIT), Bengaluru.
- VishwaCTF 2026 — Rank 46.
- BoroCTF 2026 (CyberAcad.org) — Rank 77
- Other : TJCTF 2026 , SecLeaf Q2 CTF 2026 , RAMunchers CTF , CyberGame World 2026 , 0xV01D CTF ,ZeroDay Heist 2026 CTF .

LEADERSHIP EXPERIENCE

- Participated in an Open Source Hackathon hosted by IIT Bombay and Enginow.
