PROFILE SUMMARY

Computer Engineering student specializing in offensive security, with hands-on experience across web application security, network analysis, cryptography, and OSINT. National CTF finalist (Top 60 of all India) with consistent placements across national and international hacking competitions. Built three end-to-end security projects spanning post-quantum messaging, intelligence aggregation, and web application firewalls. Seeking a Penetration Tester or entry-level cybersecurity role.

SKILLS

- **Programming:** Python, Bash, C++, C, JavaScript, HTML, CSS
- **Tools:** Burp Suite, Nmap, Wireshark, Nessus, Metasploit, Hydra, Git/GitHub
- **Areas of Focus:** Computer Networking, Web Application Security, Cryptography, OSINT, Vulnerability Assessment

HANDS-ON EXPERIENCE

- **TryHackMe:** Active learner under alias *DemonSlayer999* — **Top 2%**. Focus areas include Red Teaming, OSINT, Cryptography, and Network Analysis.
- Regular competitor in national and international CTF competitions (see Achievements) covering cryptography, web exploitation, reverse engineering, and forensics.

PROJECTS

Quantum Messaging System

- Designed a post-quantum secure messaging architecture with layered cryptography, ephemeral storage, and resilient offline-online communication.
- Implemented forward/backward secrecy, metadata protection, and scalable group messaging resistant to quantum and classical attacks.

OSINT Aggregation Platform

- Built a high-performance OSINT platform centralizing username, domain, image, and geolocation intelligence modules using React, Vite, TypeScript, Tailwind CSS, and Shadcn UI.
- Supports investigators in collecting, analyzing, and visualizing open-source intelligence with a focus on code quality and testing.

Web Application Firewall with Real-Time Threat Intelligence

- Developing a free, open-source WAF with real-time monitoring, AI/ML-powered threat detection, and automated mitigation as a self-hostable alternative to commercial solutions.
- Architected for multi-interface access (CLI, desktop, and web) for flexible deployment.

EDUCATION

Bachelor of Technology, Computer Engineering. 08/2023 – 08/2027

Sanjivani College of Engineering, Kopergaon, Maharashtra

Higher Secondary Certificate — Physics, Chemistry, Mathematics. 07/2021 – 03/2023

K J Somaiya College, Kopergaon, Maharashtra

Secondary School Certificate — CBSE. 07/2011 – 03/2021

Montfort School, Shirdi, Maharashtra

ACHIEVEMENTS — CTF & HACKATHONS

- **National Finalist** — Top 60 nationally in Cryptnite, a national CTF hackathon hosted by Manipal Institute of Technology (MIT), Bengaluru.
- **Top 46** — Zero Secure, VishwaCTF 2026. **Rank #77** — BoroCTF 2026 (CyberAcad.org).
- **Participant** — MythX CTF (KIET Cybersecurity Summit), SecLeaf Q2 2026, ZeroDay Heist 2026 (international, 8-hr), RAMunchers CTF, CyberGame World 2026 (National Cyber Security Centre).

CERTIFICATIONS

- Cyber Security Essentials, Cybersecurity Fundamentals Specialization & Encryption and Cryptography Essentials (Coursera) | Burp Suite Survival Guide & Security Hacking (Udemy) | Getting Started with Wireshark
- NPTEL, IIT Kharagpur: Employment Communication — 86% (Elite) | English for Thesis Writing — 78% (Elite)
